Executive Officer,  
Public Information Division,  
Office of Information Service,  
Department of the Air Force,  
Washington, D.C.

Dear Sir:

Two very brilliant fireballs appeared over Pennsylvania on Nov. 27 at 6:05 p.m. EST and on Dec. 7 about 5:40 a.m. EST.

Many reports, particularly on the former, have come in and I wish to compute the paths and orbits of both.

If reports on either or both of these fireballs have been sent in to you, would you be kind enough to send me copies of them?

If paths can be computed, proper acknowledgement will be given to the Air Force for any reports you can send me.

Very truly

  
Philadelphia, Pa.

2021-12-15 [REDACTED]

This is in response to your letter of December 17, 1962, in which you request any reports the Air Force may have received on two fireballs which individually appeared over Pennsylvania on November 27th and December 1st.

The Foreign Technology Division advises us that they have not received any reports on this phenomena up to the present time. However, it may be a little early yet for the December 7th sighting to have reached their office. They advise us that they will send this Headquarters any and all reports of these sightings they may receive, and in turn we will forward them to you immediately.

As a matter of information, the Foreign Technology Division does have quite a few reports of the sighting of a fireball in the Phoenix, Arizona area on November 11th. If you are interested in these, we will be glad to send them to you.

Sincerely,

HASTON M. JACKS  
 Major, USAF  
 Public Information Division  
 Office of Information
